Maths—Multiplying and dividing by 9

I have been extremely impressed by the enthusiasm and problem solving skills the class have shown this week when multiplying and dividing. The class used there knowledge of times tables and multiplying and dividing by 10 and 100 to solve problems like these.

7a. Use the numbers below to create three different calculations. Numbers may be used more than once.

$$\square = \square \times \square \times \square$$

$$\square \div \square = \square$$

$$\square \times \square \times \square = \square$$

70 450 5 9 108 3 630 270 10

6a. Emily says,

I'm thinking of a number. When it is shared into nine equal groups, there will be more than 51 but less than 69 in each group.

A.

450

B.

540

C.

405

What is Emily's number? Prove it.

English—Varjak Paw

This week the class have continued to read Varjak Paw and wrote a diary entry as Varjak. They have been looking at Alan Peat '2 LY sentences' to add exciting adverbs to their writing.

Keyboard lessons

We all started keyboard lessons this week and played a bit of the Mission Impossible theme tune already. Just imagine what we will be able to play in a few weeks time!

Demir

For great team work and creative thinking in maths!
